PROFESSIONAL PROFILE

Senior Android Engineer with 6+ years of experience, including 2+ years in Singapore's tech ecosystem. Specialising in Kotlin, Jetpack Compose, and Clean Architecture, with a proven track record of leading the full SDLC as a sole engineer and delivering production-quality apps at scale. Previously based in Singapore on an S Pass; open to relocation.

SKILLS

Android: Kotlin, Java, Jetpack Compose, Coroutines, Flow, MVVM, MVI, Clean Architecture, Android SDK
Libraries: Room, Retrofit, Dagger Hilt, WorkManager, Firebase, ExoPlayer/Media3, ML Kit, OpenCV, Paging
Tools: GitHub Actions (CI/CD), Git, Gradle, Jira, Figma
Other: Swift/SwiftUI (basic), Python (intermediate), REST APIs, Agile/Scrum
Languages: English (professional), Korean (native)

EXPERIENCE

U2medtek | Senior Android Engineer

Jan 2023 – Present | Seoul, South Korea

- Stack:** Kotlin, Jetpack Compose, Coroutines, Flow, Dagger Hilt, Room, Retrofit, WorkManager, Firebase Remote Config, MVVM
- Developed **SweetAI**, an AI-based blood glucose prediction app, as the sole Android engineer from architecture through production — helping secure a \$750K Kakao investment, a \$37K G-Star Dreamers Program grant, and CES 2024 selection.
 - Built a blood glucose monitoring app with trend visualization, integrating 100+ REST APIs, a body-fat scale SDK, and FoodLens SDK; monitored ANRs and crash rates via Firebase Crashlytics to maintain production stability.
 - Engineered the **SinusView medical device tablet app** — designed Clean Architecture with offline-first data handling, socket communication, ML Kit face detection, and end-to-end encrypted image transmission; ported Python image-analysis algorithms to Kotlin via OpenCV, enabling fully offline ML inference. ([Demo](#))
 - Implemented GitHub Actions CI/CD pipeline, automating builds and Firebase App Distribution on every merge.

99 Group | Android Engineer

May 2022 – Dec 2022 | Singapore

- Stack:** Kotlin, View Binding, LiveData, Retrofit, Clean Architecture, Coroutines
- Shipped Smart Video Phase 1 for the [99.co app](#) (100K+ downloads, 3.5★) — built video insertion, reordering, and AI-powered voice/background music customization within a 4-person Android team.
 - Led full migration of legacy RxJava codebase to Kotlin Coroutines, eliminating callback complexity across async flows, replacing deprecated APIs, and adding analytics tracking.
 - Built a new Project Detail Page and enhanced internal agent tools; collaborated with PMs, designers, backend, iOS, and QA in an Agile Scrum environment; participated in code reviews to uphold engineering standards.

Razer Inc. | Software Engineer

Mar 2020 – Apr 2022 | Singapore

- Stack:** Kotlin, Navigation Component, View Binding, LiveData, Room, MVP/MVVM
- Contributed to four global consumer apps — [Audio](#) (1M+ downloads, 4.4★), [Streaming](#), [Zephyr](#), and [Kishi](#), as part of a 5-person Android team; delivered custom UI components, animations, and responsive layouts across diverse screen sizes.
 - Implemented UI features across multiple apps in Kotlin using MVP/MVVM — translating Symplici designs into production-ready code, handling varied screen sizes, and working closely with UX to ensure design fidelity.
 - Maintained cross-device stability through systematic testing across a wide range of Android hardware, and contributed to code quality through code reviews and pair programming.

PROJECTS

Reel Mind – Movies & TV Shows ([Google Play](#))

Dec 2025 – Present

- Stack:** Jetpack Compose, Kotlin, Coroutines, Flow, Dagger Hilt, Room, Retrofit, Paging, Navigation3, Clean Architecture
- Architected a movie discovery app using the TMDB API, applying Navigation3, Paging, and Shared Element Transitions; implemented a Baseline Profile that improved app startup performance by 4.6%.

News Feed for Guardian – News & Podcasts ([Google Play](#))

Mar 2019 – Present

- Stack:** Jetpack Compose, Kotlin, Coroutines, Flow, Dagger Hilt, Room, Retrofit, Media3, Firebase, MVI
- Independently built and shipped a production news and podcast app; achieved 1,000+ downloads, 4.0★, and 99% crash-free sessions. Fully modernised the codebase from Java to Kotlin/Compose and upgraded ExoPlayer to Media3.

EDUCATION

Udacity · iOS Development with SwiftUI and SwiftData Nanodegree

Mar 2025 – Oct 2025

Udacity · Android Developer Nanodegree

Jun 2018 – Dec 2018

Pusan National University · B.S. in Nanomaterials Engineering · Busan, South Korea
